Architect: Jean-Marion Jélineau

1833-1907

He was a nephew and student of Mialhe, architect. He continued studying under Duphot, Roux and Ch. Burghet, who he became close partners with. Jélineau belonged to the very influential Société des Architectes de Bordeaux created in 1840. This society was very outspoken on questions of urban regulations.

- photo : Corner building built by Jélineau in the very early 20th century in Bordeaux showing different elements from the Renaissance style and the Louis XV style, France.
